Figure 1: Growth increments of male and female Northern Pike in Lake Wanahoo from 2012-2016. Growth increments were calculated using known lengths at the time of tagging and recapture of individual fish.

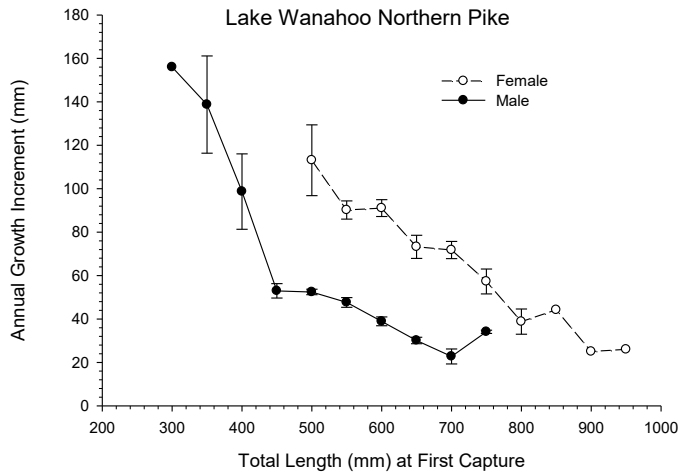

Table 3: Population estimates of Northern Pike from Lake Wanahoo during 2010-2016. Estimates were made using a closed capture model in Program Mark, where the capture and recapture rate were the same for each day.
